1. Introduction

HUN MANET (HMPC) is a meme cryptocurrency token designed to support the fans of the Prime Minister of Cambodia while driving Web3 adoption in the region. With a focus on liquidity, long-term staking rewards, and real-world business integration, HMPC aims to establish a sustainable and impactful digital ecosystem.

2. Blockchain Selection

HMPC will be deployed on either:

- **Ethereum (ERC-20):** Strong network, high security, but higher gas fees.
- **Binance Smart Chain (BEP-20):** Lower fees, faster transactions, wider accessibility. The final choice will balance community preference, transaction efficiency, and scalability.

3. Tokenomics

- **Total Supply:** 1,000,000,000 (1 billion HMPC)
- **Allocation:**
    - 30% Liquidity & Exchange Listings
    - 30% Staking Rewards (Locked for 8 Years, 30% APR)
    - 10% Team & Development
    - 15% Marketing & Airdrops
    - 10% Treasury/Reserves
    - 5% Community & Charity Initiatives

4. Smart Contract Features

- **ERC-20/BEP-20 Compliance**
- **Staking Mechanism:** Users can lock tokens for 8 years to earn 30% APR.
- **Liquidity Locking:** Ensuring stability and preventing rug pulls.
- **Security Measures:** Audit by a reputable firm (e.g., Certik, SolidProof) to prevent vulnerabilities.

5. Website & Ecosystem

Website Features:

- **Homepage:** Introduction, mission, and branding.
- **Tokenomics:** Detailed supply distribution and staking incentives.
- **Roadmap:** Future development plans.
- **Liquidity & Lock-Up:** Transparency about the 8-year staking mechanism.
- **Smart Contract Information:** Contract address and security audits.
- **DEX & CEX Listings:** Updates on trading platforms.
- **Business Vision:** Integration into finance, agriculture, and AI sectors.
- **Community Section:** Social media, governance proposals, and engagement tools.
- **Wallet Connection:** MetaMask, WalletConnect for staking and transactions.

6. Exchange Listings Plan

Phase 1: DEX Listings

- **Uniswap** (Ethereum) or **PancakeSwap** (BSC)
- Initial liquidity provision: 20-30% of total supply

Phase 2: CEX Listings

- **Mid-Tier Exchanges:** MEXC, Gate.io, KuCoin
- **Top-Tier Exchanges:** Binance, Coinbase (based on volume and demand)
- Partnerships with market makers for liquidity stability.

7. Funds from investments from HMPC

Business PlansVision:

Plan A: Crypto-Banking Integration

- Partner with **Bakong CBDC** for cross-border payments in ASEAN.
- Enable HMPC as a payment method for Cambodian SMEs.

Plan B: Agriculture Web3

- **NFT Crop Tokens**: Farmers tokenize harvests (e.g., rice, cassava) for global trade.
- **Oracles**: Use **Chainlink** to track real-time crop prices.
- **Stablecoin**: creates new stablecoin for bill loan .

Plan C: AI Development

- **Local AI Hub**: Collect anonymized data from Cambodian businesses.
- **Global Expansion**: Build a decentralized AI marketplace (similar to **Ocean Protocol**).

8. Legal & Compliance

- **Regulatory Considerations:** Ensuring the token does not classify as a security.
- **Disclaimers:** Transparent policies for investors and traders.
- **Licensing:** Exploration of regulatory requirements for financial services.

9. Community & Marketing

- **Meme Campaigns:** Driving viral adoption through social media.
- **Airdrops & Incentives:** Rewarding community engagement.
- **Influencer Partnerships:** Expanding outreach through KOLs.
- **Charity & Social Good:** Supporting local and global initiatives.

10. Challenges & Solutions

- **Security Risks:** Implementing rigorous audits and bug bounty programs.
- **Regulatory Uncertainty:** Engaging legal experts to ensure compliance.
- **Community Growth:** Incentivizing engagement via staking and rewards.
- **Liquidity Management:** Strategic allocation to maintain price stability.

11. Roadmap

Phase 1: Token Deployment & DEX Listing

- Smart contract deployment and audit.
- Liquidity provision and Uniswap/PancakeSwap listing.

● Website launch and staking mechanism activation.

Phase 2: CEX Listings & Business Pilots

● Listing applications for mid-tier CEXs.
● Development of agriculture and banking partnerships.
● AI research initiatives and collaborations.

Phase 3: Expansion & Mass Adoption

● Tier 1 CEX listings (Binance, Coinbase, etc.).
● Full-scale Web3 agricultural trade implementation.
● AI-powered blockchain tools and analytics solutions.

12. Conclusion

HUN MANET (HMPC) is more than just a meme coin—it is a movement to bridge Web3 technology with real-world economic applications. Through strong community backing, innovative business models, and strategic partnerships, HMPC aims to leave a lasting impact on the crypto landscape and beyond.
